PROFESSIONAL SUMMARY

Lead Software Engineer with 12+ years of experience designing and delivering highly scalable, resilient, and secure enterprise applications across supply chain, privacy, payroll, telecom, and banking domains. Strong expertise in Java, Spring Boot, microservices architecture, RESTful APIs, SQL, and clean architecture principles. Extensive experience in **internal system design, solution architecture, and Azure-based cloud deployments**. Proven track record of leading teams, mentoring engineers, driving architectural decisions, and delivering business-critical systems in Agile environments.

TECHNICAL SKILLS

- Programming Languages: Java, SQL
- Frameworks & Libraries: Spring, Spring Boot, Spring MVC, Spring Security, JPA
- Microservices & APIs: RESTful APIs, Spring Cloud, Microservices Design Patterns
- Databases: Oracle, MySQL, MongoDB
- Testing: JUnit, Mockito
- Cloud platform: Azure
- API Management and APIM: Gravitee (IAM, SCIM2.0)
- Architecture: Domain-Driven Design (DDD), Clean Architecture, SOLID Principles
- Tools & DevOps: Git, Maven, Jenkins, CI/CD
- Methodologies: Agile, Scrum

PROFESSIONAL EXPERIENCE

Lead Software Engineer – Blue Yonder, Hyderabad

July 2022 – Present

- Leading design and development of scalable microservices for supply chain platforms using Java and Spring Boot.
- Designed and implemented a **bulk user provisioning system**, enabling large-scale user creation by integrating with **Gravitee SCIM 2.0**. Conducted **load and performance testing** to identify optimal batch sizes, and fine-tuned chunking logic to ensure reliable, scalable, and efficient user creation per iteration
- Driving architectural decisions following Domain-Driven Design and clean architecture principles.

- Collaborating with product, QA, and DevOps teams to deliver resilient and high-performance systems.
- Mentoring engineers, conducting code reviews, and improving development best practices.
- Optimizing database interactions and improving system reliability and scalability.

Senior Software Engineer – OneTrust
June 2021 – June 2022

- Developed configuration migration systems in the privacy domain using Spring Boot and microservices.
- Built secure and scalable backend services supporting regulatory compliance requirements.
- Worked closely with cross-functional teams to deliver high-quality enterprise features.

Senior Software Developer – ADP
March 2019 – June 2021

- Developed backend services for Next Generation Payroll (NGP) and HCM platforms.
- Designed and implemented REST APIs supporting payroll processing at scale.
- Improved performance and reliability of mission-critical payroll systems.

Senior System Engineer – IBM
April 2017 – March 2019

- Developed governance, risk management, and compliance (GRC) systems for banking clients.
- Built REST services using Spring Boot and JPA to integrate disparate systems.
- Implemented unit tests using Mockito to ensure high code quality.

Software Engineer – CGI
May 2013 – May 2016

- Developed backend systems for IPTV, internet, and telecom billing platforms.
- Implemented order validation, processing, and billing workflows.
- Worked closely with business teams to deliver customer-facing solutions.

EDUCATION

B.Tech in Computer Science and Engineering
PKA college of Engineering | 2008 – 2012 | 7.64 CGPA
